Dermal Loc Application Instructions

- Always run a patch test before full application.

1. Apply a thin coat of adhesive to the polyurethane-base. While this coat is curing, apply 4-5 thin coats of adhesive to the client's scalp, making sure that each application of adhesive cures (turns clear) before applying the next coat.

2. As soon as the adhesive cures (turns clear), attach the unit.

Excessive perspiring will affect the bond. Your client should be advised to refrain from all strenuous activities for 36 hours.
