Transdermal Type II Remover Application Instructions

For use on hair systems only.

1. Put Transdermal Type II Remover in a plastic container. Completely submerge the hair system in the container. The hair system can be left in the solution for 10 minutes to 2 days. The remover should be kept at room temperature for optimal efficiency.
2. After 10 minutes, take the hair system out of the cleaner and proceed to clean the hair with your lace-cleaning gun. Once all of the adhesive is removed, work New Dimensions Dual Action Shampoo thoroughly into the hair system. Rinse the hair system with lukewarm water. Repeat at least 2 more times.
