Ultra-Safe Application Instructions

Only to be used to cleaning scalps.

1. On lace systems, spray Ultra Safe directly down through the hair system. Wait 2-3 minutes. Lean client back in sink. Pull hair system gently from the scalp, continuing to spray Ultra Safe between the hair system and the scalp until the hair system is completely removed. Wipe Ultra Safe and residue from the scalp with paper towel. Sit client back up and continue spraying Ultra Safe and wiping with a paper towel until all adhesive has been removed from the scalp.

2. With a skin (poly) system, you are not able to spray the Ultra Safe through the top of the hair system. Instead, lean your client back in the sink. Starting at the front hairline, gently pull back slightly and spray Ultra Safe onto the skin. Continue gently pulling the hair system back while spraying with Ultra Safe. Once hair system has been removed completely, continue cleaning scalps in the above directions.
