Transdermal Type II Remover

INSTRUCTIONS

For use on hair systems only

- Put Transdermal Type II Remover in a plastic container. Completely submerge the hair system in the container. The hair system can be left in the solution for 10 minutes to 2 days. The remover should be kept at room temperature for optimal efficiency.
- After 10 minutes, take the hair system out of the cleaner and proceed to clean the hair with your lace-cleaning gun. Once all of the adhesive is removed, work New Demensions Dual Action Shampoo thoroughly into the hair system. Rinse the hair system with lukewarm water. Repeat at least 2 more times.
